1) Locate the 3 sets of stock injector connectors located on the side of the engine head. These are located on the same side of the engine as the air intake. One connector is located closer to the flywheel-side of the engine, one is in the middle behind the air intake, and the last connector is located closer to the Fan-side of the engine.

7) Locate the stock MAP Sensor and disconnect. This is a 4-Pin connector located next to the air intake inlet.

8) Connect the new female MAP sensor connector into the stock male MAP sensor. Connect the new male MAP sensor connector into the stock Female MAP sensor wiring.

9) Connect the red wire with a ring terminal to a +12V constant source (i.e. battery or alternator.) Connect the black wire with ring terminal to a good chassis ground.

10) Plug the Harness into the module. Mount the module with supplied zip ties away from any excessive heat or moving parts. **Note:** Zip tie the module to the factory wire harness. Mounting the module with the connector down will help prevent moisture from collecting into the module connector
